

Many insurers have Medical Policies published to state whether they consider the Diagnostic Services to be "Medically Necessary". Many have a list of criteria that needs to be reviewed and rigidly satisfied before they will approve the service. The claim is then subject to review for Medical Necessity upon claim submission and ultimately subject to any exclusions, limitations and benefit limits of your plan, including deductibles, copay and coinsurance amounts. 1st Line Medical, Inc., the Independent Diagnostic Testing Facility (IDTF) providing the Watch-PAT testing, does not participate in any commercial insurance plans and will not take assignment of insurance for the service fees as a result of these restrictive provisions that hinder and restrict patient care and prompt customer service. Documentation will be provided to you for submission to your insurer on your own behalf and you may be eligible for full or partial reimbursement of the service fee for the diagnostic services. No warranty or guarantee of any kind, either direct or indirect, implied or specific, is made as to the availability or applicability of any insurance plan for the coverage of the service fee.

Check with your Insurance Member Service Plan Representatives for your available coverage at the Member Services contact number on the back of your insurance card. Reference CPT Code 95800, for an Unattended Diagnostic Sleep Study as the appropriate Insurance code to determine your specific coverage and benefits.

Please review our full Policy Statement in the documentation provided for you with the diagnostic service for further clarification.
